**Tools Required**

- Phillips screwdriver #2
- Allen wrench (provided)

**INSTALLATION INSTRUCTIONS**

**Handle Parts Illustration**

**NOTE:** Strike plate and key cylinder screw match your door color and are found in the closer kit. Handle style may vary. Drawings in this instruction show a right hinge installation.

**Tools Required**

- Phillips screwdriver #2
- Allen wrench (provided)

**1.** Remove lock body from edge of door and remove packaging.

**2.** Right Hinge Installation: go to Step 3.

   Left Hinge Installation: change the latch orientation.
   - A. Lift up on locking tab.
   - B. Push latch bolt through the mortise plate.
   - C. Rotate latch bolt 180 degrees.
   - D. Release latch bolt back through the mortise plate.
   - E. Release locking tab and ensure it returns to its original position.

**3.** Install lock body with attached screws.

**4.** Insert key cylinder.

**Turn-knob faces interior side**
5. Assemble: Exterior handle, black bushing, exterior face plate, and flat washer.

6. Secure with retaining clip.

7. Insert spindle.

8. Tighten set screw with provided Allen wrench.

9. Loosely assemble: interior handle, black bushing, interior face plate, and exterior assembly. Install key cylinder screw, found in Bag C in the closer kit.

11. Locate strike plate with attached screws in the closer kit. Attach to the latch rail. Adjust if necessary.

Note: Black bushing may be pre-assembled to handle.
